2006/07 Annual Report

Contact details

Address: Astronomy Australia Limited
c/o Swinburne University of Technology (H39 CASC)
1 Alfred Street
Hawthorn VIC 3122

Web: www.astronomyaustralia.org.au

Telephone: +61 3 9214 8036

Fax: +61 3 9214 4396

ACN: 124 973 584

ABN: 19 124 973 584

Vision

To provide an efficient structure to facilitate Australian investment in astronomical facilities and to be recognised by stakeholders of Australian astronomy as the organisation to co-ordinate matters of national astronomy infrastructure.

Image on front cover

A wide-field view of NGC 300 as obtained by the Anglo-Australian Observatory by David Malin is paired with extremely deep Gemini Multi-Object Spectrograph (GMOS) images (inset). The AAO image is cropped to the approximate minimum extent of the outer disk of faint stars as imaged by Gemini South in the "exploded" inset. The Gemini images reveal individual stars down to about magnitude 27 (3 sigma) in two r-band images that each have a combined exposure/integration of 8,100 seconds (2.25 hours). The Gemini images were obtained under excellent conditions that were necessary to obtain such deep images; image quality is ~ 0.6" FWHM. Gemini inset field is approximately 5.5' x 10.5'. (The small dark areas in the Gemini images are shadows from instrument "guide-probes.")

A Message from the Chairman

2007 has witnessed the beginning of a new and exciting era for the Australian astronomical community. Incorporated on 18th April, AAL was established as a permanent, independent and impartial body, already owned by almost all of the institutions that are engaged in this field throughout Australia. Through these institutions, every astronomy scientist, engineer or related professional is represented on AAL.

Building upon the success of the earlier MNRF program that was managed by AABoM through CSIRO, management of the federal government's new NCRIS program for astronomy has been entrusted to AAL directly. In addition, over the next few years AAL will have the opportunity to lodge landmark bids on behalf of the community, for funding the next generation of major astronomy infrastructure projects. AAL may also take responsibility for maintaining existing infrastructure when and if the existing owners wish to divest them. All this is of course subject to the will of the community within the guidelines set by the Astronomy Decadal Plan.

Equally exciting, in 2007 the federal government allocated an unprecedented level of funding to the Australian SKA Pathfinder – ASKAP. With total funding in excess of \$100M, this CSIRO-led project will be part-funded by the NCRIS program through AAL. This project is seen as a major step forward in Australia's bid to host the full SKA in the next decade.

In 2008 AAL will face a testing time in allocating its Strategic Reserve fund. AAL is appointing an international advisory committee to consider the merits of providing ongoing funding to GMT (Chile), PILOT (Antarctica) and/or additional 8m observing time. Other specialist committees that will assist in this process are AGMTAC, AAAAC and AGSC respectively. In relation to radio astronomy it is proposed that AAL will be advised by a new committee currently in formation.

The creation of AAL required a significant effort by many individuals, but special thanks are due to Professor Brian Boyle, Director of CSIRO's ATNF, in arranging for CSIRO to underwrite the cost of the AAL start-up period. Brian was Facilitator for the astronomy NCRIS proposal in 2006. Provision of the AAL office by Professor Matthew Bailes, Director of Swinburne University of Technology's Centre for Astrophysics and Supercomputing, is also greatly appreciated indeed.

To keep good faith with the community, it was agreed that the appointed foundation AAL Board members would submit themselves to an election process within three months of incorporation. A Nominations Committee was first appointed by the member institutions comprising: Prof Elaine Sadler (NC Chair), AAL; Prof Matthew Bailes, Swinburne University of Technology; Prof Debbie Bullock, University of Queensland; Prof John Lattanzio, Monash University; Dr Rod Hill, CSIRO and Prof Peter McGregor, Australian National University.

This committee vetted the qualifications of all nominees, having a particular focus on their commitment to astronomy and a lack of conflict of interest, while collectively being able to represent all facets of astronomy and business skills. At the first general meeting of member institutions, all five members of the foundation Board were re-elected and the two vacancies were filled.

I would like to express my appreciation to all members of the AAL Board, the Chief Operating Officer and the Company Secretary for their strong support, their wise counsel and their energy in the pursuit of ever increasing resources for the Australian astronomy community.

Chief Operating Officer's report

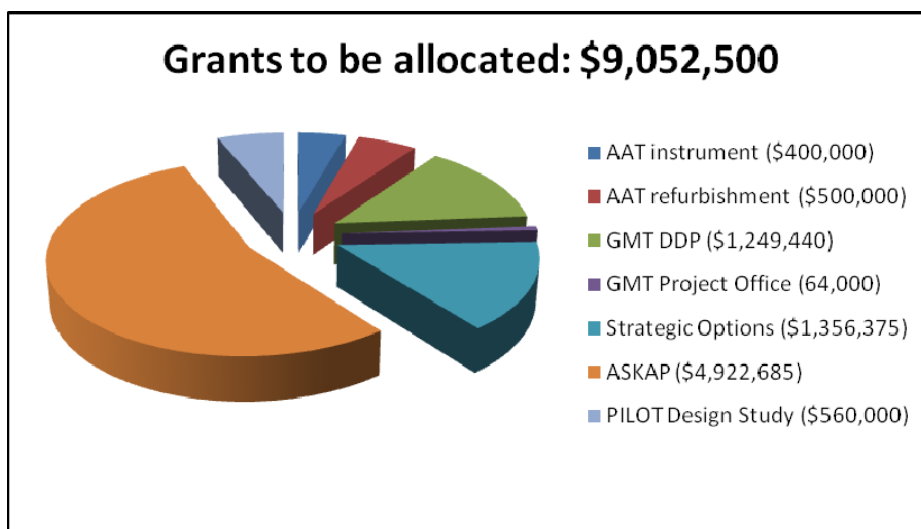

By the end of June 2007 AAL had achieved two key milestones: AAL had been recognised by the Australian Taxation Office as a charitable institution that was income tax exempt, and had signed the forty-five million dollar Astronomy NCRIS contract with the Department of Education, Science and Education (DEST), marking the formal start of the Astronomy NCRIS.

In the interests of transparency and accountability, one of the first resolutions considered by the AAL Board concerned AAL's publications policy. I'm happy to report that AAL has committed to making all key documents publicly available on its website, including finished contracts and full financial reports. This may not always be possible with contracts if the other party requires confidentially, but will be AAL's aim in all cases.

AAL published the first of its one-page quarterly updates on its website in April 2007. We will continue to publish these brief updates after each AAL Board meeting. They will be kept brief in the interests of minimising the volume of information sent to members, however, please feel free to contact AAL for additional information if required.

As AAL only existed for a little over ten weeks during 2006/07, this annual report is relatively brief. The main section of this annual report consists of the financial report, as required for a Public Company by the Australian Securities and Investment Commission (ASIC). This financial report was submitted to ASIC in October 2007. The following summary captures the key facts contained in the financial report.

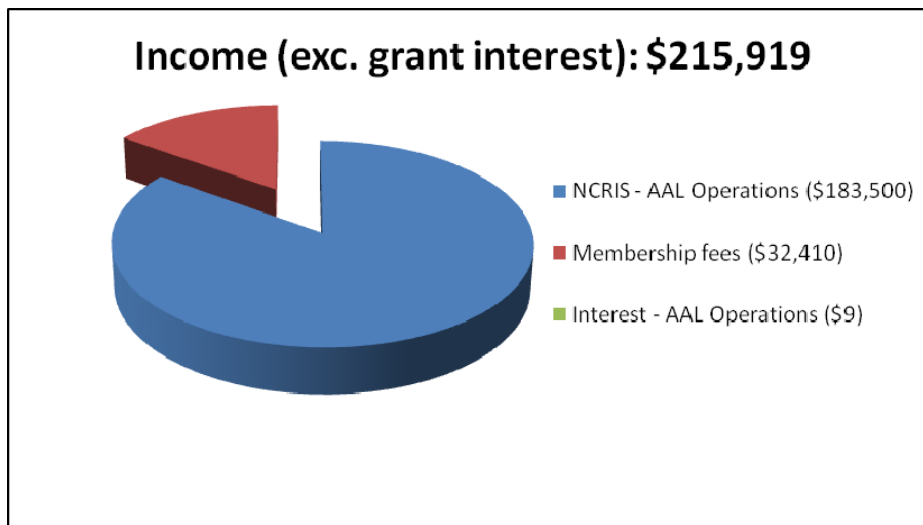

NCRIS grants to be allocated as of 30th June 2007

The above reflects the breakdown of the first Astronomy NCRIS payment, as invoiced to DEST. As this first payment was only received on 25th June 2007, no grants were paid to NCRIS participants before the close of the financial year.

As the NCRIS programme progresses, the amounts received from DEST for each project may need to be reallocated, for example, due to currency fluctuations. Future annual reports will show grant payments as well as grant receipts, and any adjustments between projects.

Income during 2006/07

In addition to the above income, the Astronomy NCRIS earned \$6,655 in interest from the NCRIS grant. This amount, and any future interest earned by the balance of the NCRIS grant accounts, will be held in reserve to be allocated to the NCRIS projects.

The budget in the Astronomy NCRIS Investment plan estimated the 2006/07 AAL income as \$243,500. The actual income of \$215,919 is 89% compared to this budget. The shortfall is due to the delay in creating AAL, which resulted in a decrease in the pro rata membership fees for 2006/07.

Expenses during 2006/07

The above expenses include the setup costs incurred during the three months prior to the incorporation of AAL, which were underwritten by CSIRO, and repaid to CSIRO in June. As expected, AAL incurred significant legal costs associated with the creation of AAL, the gaining of income tax exempt status, and the negotiation of the Astronomy NCRIS contract.

The budget in the Astronomy NCRIS Investment plan estimated the 2006/07 AAL expenses as \$243,500. The actual expenses of \$197,445 is 81% compared to this budget. This shortfall is primarily due to delays in finalising the NCRIS sub-contracts, whose legal costs will now be incurred in 2007/08.

Members and their representatives on 30th June 2007

Anglo-Australian Observatory	Prof Matthew Colless
Australian National University	Prof Gary Da Costa
Commonwealth Scientific and Industrial Research Organisation	Prof Brian Boyle
Curtin University of Technology	Prof Linda Kristjanson
James Cook University	Prof Norman Palmer
Macquarie University	A/Prof Mark Wardle
Monash University	Prof John Lattanzio
Swinburne University of Technology	Prof Matthew Bailes
University of Melbourne	Prof Rachel Webster
University of Queensland	Prof David Siddle
University of Southern Queensland	Dr Brad Carter
University of Sydney	Prof Dick Hunstead
University of Tasmania	Prof Allan Canty
University of Western Australia	Prof Peter Quinn

Note: Since the end of the financial year, Professor Harvey Butcher has replaced Professor Gary Da Costa as the Australian National University representative, and Professor John Dickey has replaced Professor Allan Canty as the University of Tasmania representative.

DIRECTORS' REPORT

Your directors present their report on the company for the financial year ended 30 June 2007. Astronomy Australia Ltd. is a company limited by guarantee.

The names of the directors in office at any time during, or since the end of, the year are:

Dr Martin T. Cole
Prof. Warrick Couch
Prof. Elaine Sadler
Prof. Brian Schmidt
Prof. Lister Staveley-Smith
Dr Michael N. Barber appointed 5 July 2007
Mr. David M. Warren appointed 5 July 2007

Directors have been in office since the date of incorporation, being 18th April 2007, to the date of this report unless otherwise stated.

The profit of the company for the financial year after providing for income tax of \$Nil, amounted to \$25,129.

Review of Operations

During the year the company commenced operation in April 2007 and began to establish its business. This involved obtaining memberships and support of key organizations, appointing a Chief Operating Officer, obtaining tax exempt status for income tax, and negotiating the funding contracts for the organisation.

No significant change in the nature of these activities occurred during the year.

The principal activities of the company during the financial year were liaison with the Australian astronomical community and ensuring investment in Australian astronomy infrastructure results in valuable national scientific infrastructure for the benefit of the entire Australian astronomical community.

To these ends the company has entered into an agreement with the Commonwealth of Australia, Department of Education, Science & Training, for the receipt of funds over five years to enable the implementation of an investment plan for the National Collaborative Research Infrastructure Strategy Capability, known as Radio and Optical Astronomy.

Other likely developments in the operations of the entity and the expected results of those operations in future financial years have not been included in this report as the inclusion of such information is likely to result in unreasonable prejudice to the entity.

No matters or circumstances have arisen since the end of the financial year which significantly affected or may significantly affect the operations of the company, the result of those operations, or the state of affairs of the company in future financial years.

The company's operations are not regulated by any significant environmental regulation under a law of the Commonwealth or of a State or Territory.

No dividends were paid during the year and no recommendation is made as to the dividends.

The directors do not recommend the payment of a dividend.

ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584

DIRECTORS' REPORT

No options over issued shares or interests in the company were granted during or since the end of the financial year and there were no options outstanding at the date of this report.

The company has paid directors' and officers' liability insurance with a policy under which all directors and officers of Astronomy Australia Ltd. are both indemnified and insured.

Company Secretary

The following person held the position of company secretary at the end of the financial year:

Mr. Robert W. Osborne, Chartered Accountant

Mr. Osborne is the principal of the firm R.W. Osborne & Associates and has held a Certificate of Public Practice since 1980. He is a Fellow of the Institute of Chartered Accountants in Australia and a Fellow of CPA Australia. Mr. Osborne is contracted to Astronomy Australia Ltd. and was appointed company secretary on 18th April, 2007.

ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584

DIRECTORS' REPORT

Information on Directors

Dr. Martin T. Cole (Non Executive Chairman)

Qualifications:

Diploma of Electronics Engineering, Master of Engineering, Doctor of Philosophy (Fluid Dynamics)

Experience:

As a member of the Prime Minister's Science, Engineering & Innovation Council (1999-2007), he chaired the PMSEIC Work Group on Astronomy. Currently he is Managing Director of Cole Innovation & Design Pty. Ltd. and its subsidiary imRAC Pty. Ltd. In 1970 he founded IEI Pty. Ltd., an electronics research and manufacturing company which grew from a zero base to generate over \$200M total sales and over 2000 person-years of direct employment. He has invented and patented many electronic security devices and systems for crime prevention. He also pioneered the development and worldwide adoption of a revolutionary fire detection system, covered by several additional patents. This system protects over 50,000 zones including the NASA Space Shuttle launch pads. Recently he launched the next generation fire-prevention technology known as Monitair™ which won an EA National Engineering Excellence Award in 2005 and has been adopted worldwide by Siemens. National President of Engineers Australia (80,000 members) 2000 and 2001. On becoming an EA Fellow in 1982, he served the EA National Council for 21 years. He designed the new corporate image for EA and held six successive portfolios as a National Vice (or Deputy) President. He initiated higher professional standards of membership, raised members' professional standing in the community, and introduced the "Council and Congress" model of governance and representation. He was also Chairman Victoria Division 1990, and was founding National President of the Society of Fire Safety 1994-99.

Interests:

Research (fluid dynamics, optical physics, electronics), cosmology (gravity & dark energy), graphic design, technical journalism, motor racing.

Family:

Christine with five children.

Special Responsibilities:

Nil

ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584

DIRECTORS' REPORT

Information on Directors

Prof. Warrick Couch (Non Executive Director)

Qualifications:

Bachelor of Science with Honours, Master of Science, Doctor of Philosophy (Astronomy)

Experience:

Optical Astronomy – Prof. Couch has a research career spanning 30 years in this area, with an extensive and distinguished track record in terms of (i) use of university, national and international telescope facilities (including the AAT, Gemini, VLT, HST), (ii) research publications (career total of 160 refereed journal papers) and citation impact (Australian citation laureate and “Highly Cited” researcher), and (iii) securing external research grant funding (career total of more than A\$3M.).

Research collaboration at the national and international level – His research has involved numerous and often high profile national and international collaborations, the most notable examples being: the Berkeley-AAO Distant Supernovae Search, the MORPHS HST Distant Cluster Imaging Program (Aus, UK, US), the 2dF Galaxy Redshift Survey (Aust-UK), and the “WiggleZ” Dark Energy Survey (Aus, Us, Canada).

National research policy and priorities – He is or has been an active member of key national astronomy committees and bodies that are responsible for dealing with research policy and priorities, including the Australian Academy of Science’s National Committee for Astronomy (at the time when it had oversight of the last decadal planning process), the Anglo-Australian Telescope Board, the Australian Gemini Steering Committee, and the executive group responsible for writing the Australian “Radio and Optical Astronomy” NCRIS Investment Plan.

Strategy formulation and implementation – He has gained considerable experience in this area through his involvement in the aforementioned national astronomy committees, particularly in developing short and long term strategies and priorities for our national astronomy infrastructure, and implementing related funding programs (e.g. MNRF and NCRIS).

Special Responsibilities:

Nil

ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584

DIRECTORS' REPORT

Information on Directors

Prof. Elaine Sadler (Non Executive Director)

Qualifications:

Bachelor of Science with Honours, Doctor of Philosophy (Astronomy)

Experience:

Radio Astronomy – Prof. Sadler has carried out many large research programs in radio astronomy, including the recently completed Sydney University Molonglo Sky Survey (SUMSS). Since 2001 she has been increasingly involved with science planning and technology development for the SKA and its pathfinder telescopes. Much of her current research uses the Australia Telescope facilities, and she currently chairs the ATNF Users Committee.

Optical Astronomy – She has spent six years as a staff astronomer and instrument scientist at the Anglo-Australian Observatory, and has also worked at major European (ES) and US (Kitt Peak) observatories. Her current research programs use the AAT, Gemini and Magellan telescopes, and she is a member of the international Science Advisory Group for the AAO's 6dF Galaxy Survey.

Research collaboration at the national and international level – She served as President of Commission 28 (Galaxies) of the International Astronomical Union (IAU) from 2003-06 and is now Vice-President of IAU Division VIII. The IAU is the world coordinating body for astronomy, and Commission Presidents are responsible for overseeing activities in their research area at an international level. She currently has active research collaborations with colleagues in Europe, India and the USA, and with researchers from several groups around Australia.

National research policy and priorities – She was involved in the Australian Astronomy decadal plan (2006-15), both at the Working Group stage and as a member of the Editorial Board which put together the final published document. She is currently a member of the National Committee for Astronomy. She has also been involved in discussion of national research issues as a member of AABoM, and as President of the Astronomical Society of Australia.

Special Responsibilities:

Chair – Nominations Committee.

ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584

DIRECTORS' REPORT

Information on Directors

Prof. Brian Schmidt (Non Executive Director)

Qualifications:

Bachelor of Science, Physics and Astronomy, A.M. in Astronomy, Doctor of Philosophy (Astronomy)

Experience:

Prof. Schmidt has expertise in:

- Optical astronomy;
- Research collaboration at the national and international level;
- National research policy and priorities
- Strategy formulation and implementation;
-

With some expertise in:

- Radio astronomy
-

He is a member of the Anglo Australian Telescope Board, an Astronomer at the Australian National University, a member of the SKA reference committee, and holds a position on the science committee of the MIRA-MWA and several other committees and working groups.

Special Responsibilities:

Nil

ASTRONOMY AUSTRALIA LIMITED

A.B.N. 19 124 973 584

DIRECTORS' REPORT

Information on Directors

Prof. Lister Staveley-Smith (Non Executive Director)

Qualifications:

Bachelor of Arts with Honours, Doctor of Philosophy (Radio Astronomy)

Experience:

Astronomy Research – Prof. Staveley-Smith is an active researcher, with 293 publications, 104 of which have been in the last 5 years. He is a member of the Editorial Advisory Committee for PASA.

Radio Astronomy – With a PhD in radio astronomy, he has worked for 16 years at ATNF, prior to becoming a Premier's Fellow in Radio Astronomy at UWA.

Research Collaboration – many of the projects that he has been involved in are collaborative in nature with national and international participation. A current example is his recent work on Gas Evolution which involves researchers from Australia, Germany, USA, Netherlands, and the UK.

National Research Policies – He is currently a member of the NCA and the Advisory Panel for the Australia-India Strategic Research Collaboration Fund. He was the immediate past Director of the Gemini and SKA MNRF and was a member of the Australian Astronomy Board of Management.

Business Administration and Finance – He was Head of Astrophysics at ATNF for 6 years and Assistant Director Astrophysics for two years, responsible for annual theme funding of \$4M. He has participated in several project management, business management and leadership courses including that of the Australian Institute of Company Directors (AICD) in February 2005.

Strategy Foundation – He has been a member of various NCRIS and Decadal Plan working groups and is also Chair of the MWA Science Council.

Special Responsibilities:

Nil.

ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584

DIRECTORS' REPORT

Information on Directors

Dr. Michael Barber

Qualifications:

Bachelor of Science with Honours, Doctor of Philosophy (Theoretical Physics)

Experience:

Dr. Michael Barber brings to the Board extensive experience:

National research policy and priorities – He has served as Secretary, Science Policy of the Australian Academy of Science, been a member on the Australian Research Council and has lead CSIRO's engagement with the National Research Priorities.

Research collaboration at the national and international level – In addition to his ARC and CSIRO experience, he has worked closely with a number of overseas agencies including FRST in NZ and the Industry Canada in the development of policies and programs to enhance collaborative research. He also has strong personal networks that include senior people in agencies such as the NSF, the National Research Council and the Carnegie Institution in the US and the European Union.

Strategy formulation and implementation – He has been a senior executive in two universities – UWA and ANU – and CSIRO in a number of roles that have all involved the development and implementation of strategy.

Special Responsibilities:

Nil.

ASTRONOMY AUSTRALIA LIMITED

A.B.N. 19 124 973 584

DIRECTORS' REPORT

Information on Directors

Mr. David Warren

Qualifications:

Bachelor of Science with Honours

Experience:

Mr. Warren brings a combination of international business experience and knowledge of astronomy as it is practiced. He has been involved in Corporate Governance to public company standards and was the company officer responsible for all legal matters. He is thoroughly and well acquainted with matters of Business Administration and Finance. Of particular relevance is his membership of the Audit and Remuneration committees of Altium Ltd. Altium Ltd. is a Sydney based company which makes CAD software for electronic design.

Physics and astronomy led him into the world of electronics and software where technologies employed at the cutting edge of science were rolled out into the commercial world. This involvement with electronics and software spans a period beginning before the microprocessor until the present age of computing and global connectivity.

He has established a DSP group in Hobart and is involved in Optical Astronomy micro-lensing studies for the purpose of discovering new planets. He has acted as an observer for the PLANET consortium of which his local UTAS micro-lensing group is a member. He is actively involved in Research Collaboration at international level by establishing micro-lensing cooperation between members of PLANET and the Brazilian National Space Agency, INPE. He is also involved in managing the collaboration with PLANET.

Special Responsibilities:

Nil.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2007

1 Statement of Significant Accounting Policies

The financial report is a general purpose financial report that has been prepared in accordance with applicable Australian Accounting Standards, including Australian Accounting Interpretations, and other authoritative pronouncements of the Australian Accounting Standards Board and the Corporations Act 2001.

The financial report is for the entity Astronomy Australia Limited as an individual entity. Astronomy Australia Limited is a company limited by guarantee, incorporated and domiciled in Australia.

The following is a summary of the material accounting policies adopted by the company in the preparation of the financial report. The accounting policies have been consistently applied, unless otherwise stated.

The financial report has been prepared on an accrual basis and is based on historical costs and does not take into account changing money values, or except where stated, current valuations of non-current assets. Cost is based on the fair values of the consideration given in exchange for assets.

Income Tax

The company is an income tax exempt charitable institution.

ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2007

Property, Plant and Equipment

Each class of property, plant and equipment is carried at cost or fair value less, where applicable, any accumulated depreciation and impairment losses.

Plant and equipment

Plant and equipment are measured on the cost basis less depreciation and impairment losses.

The carrying amount of plant and equipment is reviewed annually by directors to ensure it is not in excess of the recoverable amount from these assets. The recoverable amount is assessed on the basis of the expected net cash flows that will be received from the assets' employment and subsequent disposal. The expected net cash flows have been discounted to their present values in determining recoverable amounts.

Depreciation

The depreciable amount of all fixed assets including building and capitalised lease assets, but excluding freehold land, is depreciated on a diminishing basis over their estimated useful lives to the economic company commencing from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2007

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks or financial institutions, investments in money market instruments maturing within less than three months. Bank overdrafts are shown in current liabilities in the Balance Sheet.

Revenue

Revenue from the rendering of a service is recognised upon the delivery of the service to the customers.

Interest revenue is recognised on a proportional basis taking into account the interest rates applicable to the financial assets.

Dividend revenue is recognised when the right to receive a dividend has been established.

ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2007

Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Tax Office. In these circumstances, the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the balance sheet are shown inclusive of GST.

Cash flows are presented in the cash flow statement on a gross basis, except for the GST component of investing and financing activities, which are disclosed as operating cash flows.

Grants

Grants are recognized at fair value where there is reasonable assurance that the grant will be received and all grant conditions will be met. Grants relating to expense items are recognized as income over the periods necessary to match the grant to the costs they are compensating. Grants relating to assets are credited to deferred income at fair value and are credited to income over the expected useful life of the asset on a straight-line basis.

Grants related to projects to be undertaken by Third Parties are held as current liabilities to be paid in accordance with the funding agreement.

Comparative Figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

Critical Accounting Estimates and Judgments

The directors evaluate estimates and judgments incorporated into the financial report based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the company.

Key Estimates – Impairment

The company assesses impairment at each reporting date by evaluating conditions specific to the company that may lead to impairment of assets. Where an impairment trigger exists, the recoverable amount of the asset is determined. Value-in-use calculations performed in assessing recoverable amounts incorporate a number of key estimates.

No impairment has been recognized in respect of the year ended 30th June 2007.

The financial report was authorised for issue by the board of directors on 24th October 2007

DIRECTORS' DECLARATION

The directors of the company declare that:

1. The financial report and notes, as set out on pages 1 to 25, are in accordance with the Corporations Act 2001:
 - (a) comply with Australian Accounting Standards and the Corporations Regulations 2001; and
 - (b) give a true and fair view of the financial position as at 30 June 2007 and of the performance for the year ended on that date of the company.
2. In the directors' opinion there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of the Board of Directors.

Director:

Dr Martin T. Cole

Director:

Prof. Warrick Couch

**INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584**

Report on the Financial Report

I have audited the accompanying financial report of Astronomy Australia Limited which comprises the balance sheet as at 30 June 2007, and the income statement, statement of changes in equity and cash flow statement for the year ended on that date, a summary of significant accounting policies and other explanatory notes and the directors' declaration.

Directors' Responsibility for the Financial Report

The directors of the company are responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the Corporations Act 2001. This responsibility includes establishing and maintaining internal control relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101: "Presentation of Financial Statements", that compliance with the Australian equivalents to International Financial Reporting Standards (IFRS) ensures that the financial report, comprising the financial statements and notes, complies with IFRS.

Auditor's Responsibility

My responsibility is to express an opinion on the financial report based on my audit. I conducted my audit in accordance with Australian Auditing Standards. These Auditing Standards require that I comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Independence

In conducting my audit, I have complied with the independence requirements of the Corporations Act 2001. I confirm that the independence declaration required by the Corporations Act 2001, provided to the directors of Astronomy Australia Limited on 24th October 2007, would be in the same terms if provided to the directors as at the date of this auditor's report.

TO THE MEMBERS OF ASTRONOMY AUSTRALIA LIMITED
A.B.N. 19 124 973 584**

Auditor's Opinion

In my opinion:

- (a) the financial report of Astronomy Australia Limited is in accordance with the Corporations Act 2001, including:
 - (i) giving a true and fair view of the company's financial position as at 30 June 2007 and of its performance for the year ended on that date; and
 - (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the Corporations Regulations 2001.
- (b) The financial report also complies with International Financial Reporting Standards as disclosed in Note 1.
